

Innovation & Creativity in Business training - 1 day

Business is a constantly changing environment. What used to work often no longer does. Without change and growth businesses come under ever increasing threats from competition that gets ever smarter. The problem is how you motivate the key players in your organization to be more Innovative, to find new ways of doing business, to find better ways of solving problems, and to stop problems before they even occur.

This Innovation Creativity course is designed to show people how to 'Think Outside the Box' and be more Innovative and Creative in the way they approach situations; whether they are serious problems, New Product creation, or simple day to day activities. It's an old adage 'work smarter not harder'; this course can show you how.

This Innovation Creativity training course is very interactive and thought provoking, involving team exercises to reinforce the techniques taught.

Innovation & Creativity in Business Training Course Objectives:-

By the end of the Innovation & Creativity training course participants will have:-

- A clear understanding of what Innovation is and how to apply it.
- Completed several practical exercises using different techniques.
- An understanding of which techniques suit which problems.
